## EDUCATION

---

### Telkom University Purwokerto

Bachelor of Information Systems

Expected 2029  
Purwokerto, ID

- Status: Active Student
- Relevant Coursework: Data Structures & Algorithms, Web Development, and Mobile Development

## EXPERIENCE

---

### Software Developer

July 2024 – Nov 2024

Atase Perdagangan Canberra (Internship)

Purwokerto, ID

- Developed a Rakornis landing page using React JS for coordination meetings between central and regional government officials, and maintained tanya-atdag.au and EEI (Export Expert Indonesia) websites using WordPress.

### Software Developer

Sept 2025 – Sept 2026

PT. Smartelco Solusi Teknologi (Contract)

Purwokerto, ID

- Engineered and maintained frontend and backend features using React, SolidJS, TypeScript, and Rust, improving system reliability and application performance across internal enterprise systems.
- Integrated frontend components with RESTful APIs, optimizing data flow and enhancing user experience across multiple modules.
- Collaborated with cross functional teams to deliver high quality internal applications on schedule and improve overall system stability.

## PROJECTS

---

### WFM IOAN Backend System | Rust, Docker, REST API

- Designed and developed RESTful APIs to manage technician data, including creation, updates, status tracking, skills, and availability.
- Implemented location based task assignment and KPI analytics, enabling scalable and efficient operational workflows.

### HCM – Human Capital Management System | React, TypeScript, Cube.js

- Developed an Analytics and AI powered dashboard using **React**, **TypeScript**, and **Cube.js**, transformed Cube API responses to optimize data table integration.
- Integrated real AI APIs, managed service credentials securely, implemented robust error handling and real-time analytics with dynamic widgets.

### Reengineering Tool | SolidJS, TypeScript, Clean Architecture

- Developed comprehensive material tracking dashboard using SolidJS, TypeScript, and Clean Architecture, transformed API responses to optimize data table integration with real-time filtering and search capabilities.
- Implemented Excel import functionality with FormData handling, managed API credentials securely, built robust error handling and dynamic modal workflows with progress feedback systems.

### SmartGuard – Smart Attendance & Patrol Management System | SolidJS, TypeScript, Rust

- Developed the Patrol Management module including live GPS officer tracking on an interactive map (MapLibre GL), patrol assignment dispatch, QR checkpoint scanning, and structured incident reporting with urgency classification and dispatch workflow (Open → Dispatched → Resolved).
- Built scalable RESTful APIs in Rust (Actix-Web) to handle patrol assignments, real-time GPS tracking, incident lifecycle, checkpoint reporting, and route & area configuration, integrated with SurrealDB and voice transcription via AssemblyAI.

### SmartRMJ – Fiber Optic Project Management System | React, TypeScript, Rust, SurrealDB

- Built a full-stack field operations system (Survey → DRM → Installation) for fiber optic projects, with document finalization, BOQ/KML/Matrix cross-phase propagation, and AG Grid Enterprise tree-data tables.
- Technical Item Comparison feature - Survey vs. DRM vs. Actual reconciliation dashboard with editable overrides and real-time diff detection.

## SKILLS

---

**Programming Languages:** JavaScript, TypeScript, Rust, Go, Dart

**Frontend:** React, SolidJS, Next.js, Tailwind CSS

**Backend:** Rust, Express.js, REST API

**Tools & Technologies:** Git, GitHub, Docker, Docker Compose, Postman

**Soft Skills:** Problem Solving, Team Collaboration, Analytical Thinking, Adaptability, Communication, Time Management
